

# ARTICULATION AGREEMENT

between

BOROUGH OF MANHATTAN COMMUNITY COLLEGE  
City University of New York

and

CITY COLLEGE OF NEW YORK  
City University of New York

Borough of Manhattan Community College, hereafter BMCC, and City College of New York, hereafter CCNY, enter into the following articulation agreement for the transfer of credit and courses, effective September 1, 1999. This agreement will involve the departments of Computer Information Systems; Music and Art; and Speech, Communications and Theater, BMCC, and the Department of Art, Electronic Design & Multimedia, CCNY. It is restricted to students enrolled in BMCC's proposed program in Multimedia Programming and Design leading to an Associate in Applied Science degree.

BMCC students with the A.A.S. degree in Multimedia Programming and Design who meet CCNY's specified criteria, including portfolio review, passage of the CUNY Basic Skills Assessment Tests in Mathematics, Reading and Writing, shall be admitted as candidates for the following baccalaureate degree:

Electronic Design & Multimedia

B.A. 120 credits

Acceptance in this program will be under the requirements in effect at the time of admission and may be subject to such changes as shall be determined by CCNY's academic policies and curricula. Transfer students must pass a CCNY portfolio review. To earn a B.A. degree, transfer students must earn a minimum of 60 credits in residence, with 60% (or a minimum of 24) of the 40 credit specializations to be completed at CCNY. All of the major distribution requirements in Electronic Design and Multimedia must be satisfied. Certification of graduation is assured upon completion of a minimum of 120 credits with a cumulative index of 2.0. This 2.0 index is also required in the major, the minor and/or interdisciplinary program.

CCNY, consistent with the articulation guidelines of the Board of Trustees of the City University of New York, agrees to accept a minimum of 60 credits of course work for graduates of BMCC's program in Multimedia Programming and Design. CCNY will award either reduced credit or no credit for course work evaluated as remedial or compensatory. If the sample program enclosed with this agreement is completed without exception, then no more than 60 credits will be required for completion of the B.A. in Electronic Design & Multimedia.

With respect to the foregoing BMCC sample program, CCNY agrees to accept each component as either equivalent to a particular course in its offering or elective in the field of study of the course in question. More specifically, CCNY accepts all courses described in the program in satisfaction of A.A.S. degree transfer requirements, subject to portfolio evaluation.

In order to facilitate the efficient transition between our institutions, interested BMCC candidates are urged to use the BMCC Academic Advisement and Transfer Center in conjunction with the pre-transfer advisement services of CCNY. CCNY services may be performed at CCNY, or, by pre-arrangement, on-site at BMCC. Successful graduates/transfers are also assured of availability of all ancillary services at CCNY.

It is to be understood that BMCC will notify CCNY of any changes in the Multimedia Programming and Design curriculum, and that CCNY will notify BMCC of any changes in the Electronic Design & Multimedia curriculum. All changes in the CCNY requirements will be considered with a view to minimizing the total number of credits to be completed by BMCC graduates/transfers.\*

All the preceding agreements and commitments are herein certified as binding upon both BMCC and CCNY until declared terminated by mutual consent.

- BMCC has been advised that CCNY has filed a Letter of Intent for a proposed B.F.A. in Electronic Design and Multimedia, with a proposed start date of September 1, 1999. BMCC will be advised of the application procedures and admission requirements for the proposed program so that a separate articulation agreement can be pursued. CCNY will also continue to offer the B.A. specialization in Electronic Design and Multimedia.

The proposed sample program in Multimedia Programming and Design for BMCC students and CCNY's B.A. in Electronic Design & Multimedia:
