

National Park Community College Transfer Policy

A student admitted as a “transfer” is one who has successfully completed six (6) hours of college level courses at another regionally accredited college or university. Students previously enrolled in other postsecondary institutions must provide evidence of good standing from those institutions. Transfer students who are not eligible to return to their previous institution because of academic or disciplinary reasons will not be considered for admission until they have been out of college for at least one regular term (fall or spring) or are eligible to return to the previous institution. A summer term does not fulfill this requirement. NPCC accepts transfer credit from any regionally accredited college or university. Applicability of credit to specific degree programs is subject to the most current published policies of the institution and the program, including but not limited to a minimum grade of "C" on prerequisite courses and a limit on the age of some courses required by occupational programs. In addition, a minimum of 18 semester credit hours of any associate degree granted by National Park Community College must be completed at NPCC, regardless of transfer credits. Each additional associate degree will require an additional 18 semester credit hours with the college. All degree requirements must be met as well, and a cumulative NPCC grade point average of 2.00 or higher is required for graduation. Credit earned at unaccredited institutions is not accepted in transfer; however, any student applying for a particular occupational program may request that the credit be evaluated by the program director. Departmental exams, CLEP tests, and/or course substitutions may be recommended by the evaluator as a method of expediting program completion.

REQUIREMENTS:

1. Complete an application for admission.
2. Placement test scores (ASSET, COMPASS, ACT or SAT) are required prior to registration or evidence of satisfactory completion of the pre-requisite(s) for the course(s).
3. Students born on or after January 1, 1957, must submit proof of measles, mumps and rubella immunizations.
4. Official academic transcripts from all previously attended colleges/universities attended sent directly to the Registrar’s Office prior to the registration period. Transcripts must be received no later than 30 days after classes begin.
5. High School transcript or GED test scores.
