

About Transfer Credits

- Capital will award college credit for all courses successfully completed at a regionally accredited college or university, except for developmental level courses.
- The department chair/academic advisor for the program in which you enroll must approve the acceptance of these credits toward a degree program.
- To receive a major from Capital University you must complete 12 semester hours in the major in residence at Capital University. No student may be awarded a major by a department or college unless core requirements of the college in which that major is located are met.

Transcript Review

Once you're accepted, we will review the official college transcripts for course equivalency. You will receive a copy of the degree audit which will list the General Education Courses that transfer along with a list of all courses that transfer. A faculty advisor will determine how the courses apply to the degree, so you should contact the Admission office to schedule a meeting with a faculty advisor to find out how your major classes transfer and how long it will take to complete your degree.
