

Transfer Credit

Students accepted to an Associate degree program may transfer in as many as 30 credits of previously completed college level coursework with grades of C- or better. Students accepted to a Baccalaureate degree program may transfer in as many as 70 credits. Please note that, while Dean will accept as many of your credits as possible, application of those credits towards a degree will depend on the courses completed and their Dean College equivalency as well as the student's academic program of choice.

Dean will provide all transfer students a full analysis of their transfer credit before a final decision to attend Dean College needs to be made, as long as official transcripts are submitted in a timely manner.
