

Transfer of Credits

Mount Marty College has a liberal transfer policy. Courses for which any grade higher than a "C-" was earned will transfer in accord with the guidelines described below. Courses at the remedial level will not transfer for undergraduate credit. Courses at previous colleges granted by credit by exam or credit for prior learning will need additional documentation for acceptance for credit. Courses from accredited baccalaureate or higher institutions will be accepted. For courses from accredited Vocational, Technical and Community College institutions, Mount Marty College will accept all credit toward the degree that would be considered a course-for-course match (i.e. Composition, Literature, College Algebra, etc.) or are appropriate for a degree; with transcription of credits only of those courses which actually apply toward the student's major, minor, or general education course of study. For courses which are vocational-technical in nature (i.e. welding, cosmetology, mechanics, etc.) up to 15 credits could be applied as elective credit toward the student's major, minor, or general education course of study. If there is a more formalized articulation made between Mount Marty College and the Vocational, Technical or Community College programs, credit will be granted as agreed upon in the formal articulation.

The student's cumulative grade point average for all previous coursework will be used for acceptance into Mount Marty College. All courses that are transferred become part of the student's permanent record. Only the credits that actually apply toward the major, minor, general education, elective, or certification authorizations course of study will be transcribed. Transfer grades are not included in the Mount Marty College GPA, but are used in determining honors for graduation.

Prior to making application to the college, the prospective transfer student is invited to submit an unofficial or official transcript(s) for a transfer credit academic evaluation at no charge. This credit evaluation will determine what credits will transfer and what credits you have left to complete your degree.
