

Credit from Accredited Institutions

Students who transfer and enroll into a degree program at SPC should meet with a faculty advisor or the Counseling Center to complete a degree plan and have their transcript evaluated to determine the amount of college-level credit that will transfer to South Plains College. Specific degree requirements met by transfer credits will be evaluated and approved by appropriate department/program advisor and divisional dean. Only college level courses will be applied toward a degree program; evaluation of transfer course work is based upon the student learning outcomes and/or program outcomes.

College-level credits from regionally accredited colleges and universities (U.S.) are accepted in transfer, but only those courses with a passing grade are acceptable toward fulfillment of graduation requirements at South Plains College.

Credit for CTE Articulated Courses

South Plains College articulates Career and Technical Education (CTE) coursework with high schools. Students enrolled in specific CTE programs of study offered through affiliated high schools may receive semester hour credit for courses identified in articulation agreements and course crosswalk.

Conditions for awarding credit are as follows:

- No tuition, fees or qualification exam will be required for the credit hour courses identified in the articulation agreement.
- College credit will be awarded without grade point consideration for semester hours. Students must earn a grade of "B" or higher in their high school class in order to earn college credit.
- College semester hour credit for Tech Prep classes will be awarded upon enrollment at the college. Hours will automatically be added to the transcript.
- Credit will be transcribed if a student enrolls at SPC within 15 months of high school graduation. Beyond 15 months, program faculty can recommend Tech Prep credit be accepted based on approval of appropriate departmental chair and divisional dean.

Earned credit will apply toward the Associate of Applied Arts degree, Associate of Applied Science degrees and the Certificate of Proficiency.

CTE articulated credit will not automatically transfer to universities. Credit may be transferred under articulation agreements between SPC and partnering universities based on program by program basis. Students should consult program advisor for additional information.
