

How can I determine if my credits transfer?

Most credits from four-year regionally accredited institutions transfer to USF, as well as credits (maximum of 64) from two-year regionally accredited institutions.

If you have completed any post-secondary coursework, bring your transcripts with you to your campus visit. We'll provide immediate information to you about how your credits may transfer into your program of study. It's that easy.

Once you are accepted and pay your deposit, the Registrar's Office will conduct an official evaluation and degree audit. This information will be shared with your advisor in preparation for your registration.

What criteria do I need to satisfy to graduate?

- You will need to complete 128 credits.
- You will need to complete your final 30 credits and half of your major requirements at USF.
- You will need to complete USF's [liberal arts core](#) requirements.
